JOHN MARK MOLINA

Lead Associate — Data Analytics & Web Automation

Phone: +63 994 272 2354 | Email: jm.me6299@gmail.com | Location: Philippines

ABOUT ME

I am a Lead Data Analytics Specialist and Web Developer dedicated to modernizing operational workflows. By bridging Power BI modeling, custom vanilla JavaScript tools, and Power Automate workflows, I transform complex organizational data into clear, actionable reporting interfaces that streamline daily decision-making.

PROFESSIONAL EXPERIENCE

Lead Associate — Data Analytics
Present

WNS Global Services

- Lead end-to-end operational data reporting and HR analytics workflows serving cross-regional site operations across WNS (Iloilo) and WNS (Manila).
- Architect and maintain interactive team performance dashboards, engineering dynamic multi-tier incentive calculation engines (A-Team Incentive Plan).
- Identify operational bottlenecks and replace legacy reporting processes with custom, automated web tools and centralized data views.
- Collaborate with operations teams to standardize Key Performance Indicators (KPIs) and deliver clear visual insights to management.

Developer & UX Designer — Digital Transformation
Ongoing

MIS Digital Transformation Initiative

- Develop custom web tools built with vanilla HTML5, CSS3, and JavaScript, integrating SheetJS for instant client-side Excel parsing and data visualization.
- Design and implement enterprise automation workflows using Power Automate ("Send Email v2") for notification triggers, scheduled reports, and status updates.
- Establish direct semantic connections between front-end web applications, Power BI Fabric Semantic Models, and Databricks data layers.

KEY PROJECTS

- **Multi-Site Performance Reporting Suite:** Built site-level performance tracking divided specifically for WNS (Iloilo) and WNS (Manila) operations.
- **Client-Side SheetJS Excel Engine:** Built lightweight, zero-dependency browser applications allowing users to drag-and-drop spreadsheets for automated data extraction and analysis.
- **Event Branding & Media Suite:** Designed complete program flows, booklet layouts, projector visual assets, and presentation packages for quarterly Rewards and Recognition programs.

TECHNICAL SKILLS

DATA ANALYTICS & BI

Power BI | Fabric Models | Databricks | SheetJS | Bravo BI | Data Modeling

AUTOMATION & WEB

Power Automate | Vanilla HTML5 | CSS3 | JavaScript (ES6+) | UX / UI Design | GitHub / Copilot

OPERATIONS & HR

HR Analytics | Workflow Design | Performance Metrics | Internal Reporting | Incentive Modeling

DESIGN & MEDIA

Canva | Graphic Layout | Event Branding | Presentation Design

PROFESSIONAL FOCUS

Specializing in bridging operational analytics and web-based process automation. Focused on building intuitive digital interfaces that empower teams and eliminate repetitive tasks.
